

CYLINDER HEAD GASKETS

Cylinder Head Gaskets

CTP Cylinder Head Gaskets offer excellent durability and lasting sealing of your engine. CTP's Graphite, Composite and MLS (Multiple Layer Steel) Head Gaskets are designed and manufactured to provide protection against reduced torque loss and shearing loads. Special coatings, and elastomeric sealing beads are applied on most gaskets to ensure proper oil, water and coolant sealing.

The perfect combination of space age materials offer resistance to high temperatures and extreme combustion pressures found in today's high performance diesel engines.
