

New CTP Replacement Parts for Heavy Equipment

CTP SELF-LOCKING NYLON PATCHED PARTS

strong hold
tough seal

Why use CTP parts with Self-Locking Nylon Patch?

CTP offers the Self-Locking Nylon Patch alternative for your hardware needs. This self-locking nylon patch formula is specially designed as non-ozone depleting locking and sealing coating for threaded fasteners. It ultimately prevents fasteners from loosening, even under extreme vibration.

Advantages of using parts coated with self locking nylon patch:

- ✓ **Powerful lock and seal:** with the self locking nylon patch, parts hold their place even during extreme vibration.
- ✓ **Reusable:** using steady pressure and standard hand tools, parts with self locking nylon patching can be easily adjusted and reused as many times as needed.
- ✓ **Minimize Stripping:** because the self locking nylon patch remains a thick, flexible coating, its cold flow properties would truly minimize stripping of soft threads during reuse.
- ✓ **Shelf Life:** All parts coated with the self locking nylon patch can be stored indefinitely before use.

Part No.	Description
0315085	Bolt
1076826	Bolt
1749638	Bolt
2160029	Screw
4E5985	Bolt
4V7080	Bolt
5K5552	Bolt
6K4370	Inlay
6K5718	Bolt
7K4370	Bolt
